## The Venusure Laser Medical system

A low-level-laser-therapy (aka photo-bio-modulation-therapy) medical device that gives the highest power output and the largest treatment area in the world. The Venusure, which has 366 pieces of patented laser diodes rather than LED, irradiates the body surface with red and near-infrared laser to activate mitochondria function by photon, rather than heat. The Venusure can improve microcirculation, relax muscles, relieve neuralgia pain, shoulder pain, joint disease pain, and promote wound healing.

- Dual wavelengths : 660nm and 980nm
- Highest laser power: 63600 mW
- Largest treatment area : 600 $cm^2$
- Laser sources:
  366 High-tech laser diodes
- Mechanism: Photo biomodulation
